

To whom it may concern,

It gives me immense pleasure to me to write this letter of recommendation for Dr. Awase Khirni Syed. Dr. Syed has been worked with my research group since the Fall term of 2020 as a Research Scientist. I was able to join a reading group which had been organized and lead by Dr. Syed since Winter term of 2020. The reading group mainly helped us to build more skills about critical thinking and research topic hunting.

As a mentor, Dr. Syed has always generously shared his view and experiences. During his time in the reading group, he always encourages us to critic and then find some interested research topics from papers, and he also share all his professional suggestions to us. I am always inspired him after joining his reading group.

Dr. Syed is a delight to work with and I wouldn't hesitate to recommend him the academia position.

Should you have any further questions about him, please feel free to reach me.

Thanks,

Lanying Wang
